## Agenda

-Reupload and Complete Artist Statement for Color and Realism Project in Artsonia

### Vocabulary:

**Colored pencils** - Colored pencils are a drawing medium that consist of pigment that is held together by a waxy (or oil) binder that has been formed into a shaft and enclosed in a wooden casing.

**Pigment** - Naturally occurring or synthetic material (usually powder) that gives a material or medium its color.

**Binder** - A material or medium that acts an agent to hold pigment so that it may be spread or transferred to a surface.

**Layering** - A drawing or painting technique in which a medium is built up on a surface through multiple applications. Often, different colors or varieties of a related color are layered with semi-transparent applications resulting in greater depth of color.

**Burnishing** - A colored pencil drawing technique in which layers of medium can be mixed and moved on the surface because of the waxy nature of the binder in colored pencils. Areas can be lightened, darkened, be made cooler or warmer gradually using this technique.
